

Colocation & Disaster Recovery

Our SOC-2 compliant Data Center is located in Saginaw, MI with co-location services in Grand Rapids and the Greater Detroit Area. Our secure, climate controlled environment includes multiple fiber connections, redundant UPS power protection, and backup generator to assure maximum up-time no matter what outside forces impact us.

Our Regional Data & Disaster Recovery Center provides a location for continuity of service when the unthinkable happens.

We Make **Data** Simple

24/7 Monitoring & Management

With NetSource One, your most critical systems will benefit from around-the-clock maintenance and monitoring.

Drive Down Cost

Say goodbye to the costs associated with powering, maintaining and managing an in-house server.

Data Security

Feel secure knowing that your data is protected and safe within the walls of a continually monitored data center.
